

## Professional Summary

Skilled web development professional with strong technical expertise in HTML, CSS, and JavaScript. Demonstrates commitment to team collaboration and delivers reliable, high-quality work. Adaptable to changing project needs, ensuring seamless integration and user-focused design. Known for effective problem-solving and results-driven approach. Passionate about leveraging technical expertise to create innovative solutions that enhance usability and accessibility, driving impactful results in every project.

## Education

### Coursera

[Google UX Design Certificate](#)  
2023

### College of the North Atlantic

Diploma - Programmer Analyst /  
Software Development (Co-op)  
2016 - 2019

## Work History

### Software Developer - AI Trainer (Contractor)

#### Data Annotation

June 2024 - Present | Remote

- Perform accurate data labelling, research, and testing to train large language models (LLMs), contributing to the enhancement of AI systems.
- Write code snippets and use problem-solving to evaluate code quality produced by LLMs for correctness and performance.
- Efficiently manage a self-directed work schedule, adhering to strict deadlines while upholding high standards of accuracy and quality.

### Front-End Developer

#### Government of Newfoundland and Labrador

Oct 2018 - Dec 2018 (Co-op),

May 2019 - June 2024 | St. John's, NL, Canada

#### [MyGovNL Project](#)

- Developed responsive web components and implemented a design system using HTML, CSS, and JavaScript to support government operations.
- Collaborated with designers to implement user-friendly interfaces and enhance user experience. Implemented accessible and responsive web designs to ensure optimal user experience across devices.
- Coordinated with individual departments to overhaul public websites using WordPress. Trained staff in WordPress usage to add new pages and content.
- Executed cross-browser testing and debugging to ensure compatibility and consistent performance across platforms.
- Created automated tests for testing website functionality and flow. Trained team members in unit test creation.
