

Experience

Software Developer - AI Trainer (Contract)

Data Annotation

April 2024 - Present | Remote

- Perform accurate data labeling, research, and testing to train machine learning models, contributing to the enhancement of AI systems.
- Select and manage various projects, adhering to strict deadlines while upholding high standards of accuracy and quality.
- Efficiently manage a self-directed work schedule, balancing multiple projects and personal commitments to consistently meet deadlines.

Computer Programmer

Government of Newfoundland and Labrador

Oct 2018 - Dec 2018 (Co-op),

May 2019 - June 2024 | Newfoundland and Labrador, Canada

MyGovNL Project

- Created reusable web page components through scalable code as determined by UX team wireframes, ensuring a mobile-first approach and adherence to online accessibility considerations and best practices.
- Co-ordinated with individual government departments and revamped 5+ legacy department websites by migrating pages and content to newer WordPress template-based websites. Trained department staff on the use of WordPress and adding new pages and content.
- Implemented a design system of centralized web components, driving a 40% improvement in streamlined development.
- Composed comprehensive user stories and coded 200+ automation scripts for creating user accounts and testing website functionality and flow. Trained 5+ team members to set up, code, and run automated scripts.
- Updated 2 antiquated UI wireframes to reflect features currently in production. Designed 3 new prototypes for anticipated feature implementations.
- Researched email development best practices and produced 20+ email templates using HTML and CSS with compatibility across popular email clients.
- Collaborated with over 20 team members in an Agile methodology setting. Contributed ideas and implemented changes from feedback, helping to ensure the success of the project.
- Provided technical support for 1000+ end-users by responding to messages and questions via email and logging user issues to an internal IT support ticketing system.

Education

College of the North Atlantic

Diploma - Programmer Analyst /
Software Development (Co-op)

2016 - 2019
